

# HealthPros

International Training Network for  
Healthcare Performance Intelligence Professionals

## Introduction

Here we present the 10<sup>th</sup> and final HealthPros newsletter. The project was extended for 4 months, which means that the end of March the EU funding will end. Some of the fellows are finalizing their theses and moving on. At the recent final HealthPros consortium meeting in Utrecht (Nov 3-5, 2021), the fellows presented and discussed their thesis outline and main findings from their work. We were very happy to be able to (at least partly) meet face-to-face again for this meeting. It was very good to see 3 years of work coming together and it made us realize what a very nice consortium and project this has been!

## Save-the-date for our Public Conference

We previously reported that we would have a final management team meeting February 24<sup>th</sup>, followed by a final public (digital) event on February 25<sup>th</sup> 2022, discussing 'The transferability of HealthPros' findings to high, middle and low-income health care systems' with international experts. Due to the COVID-19 pandemic, we decided to postpone this meeting and event exactly one month, to March 24-25. Indeed, happily, the pandemic seems to have (temporarily?) moved past its summit and the management team will be able to meet face-to-face. We are currently busy preparing the final deliverables and the digital event.

In advance of the public event, all fellows have prepared a 3–5-minute **video on the main findings** of their project. Some of these videos are already finalized and public, others will follow soon. They will be posted on LinkedIn and Twitter, and are also accessible via the website (<https://www.healthpros-h2020.eu/index.php/research/short-project-descriptions>)

Please save the date for the public event. The Zoom link will follow soon (via social media and on the website).

International Training Network for Healthcare  
Performance Intelligence Professionals

**Final Conference on HealthPros Findings**  
Friday March 25th 2022 | Zoom

**11:00-12:30 CET Session 1: Healthcare performance measurement**  
Confirmed panellists: Jeffrey Braithwaite and Jens Winther Jensen

**13:00-14:30 CET Session 2: Performance-based healthcare governance and end-user involvement**  
Confirmed panellists: Kathleen Morris and Jeremy Veillard

Free zoom registration link to follow. For questions, contact [l.zuidmeer@amsterdammc.nl](mailto:l.zuidmeer@amsterdammc.nl)

The conference will focus on the lessons learned during the project, which has been condensed in recommendations on various aspects of performance-based healthcare governance and

end-user involvement, published in short reports, which we refer to as the 'Healthcare Performance Intelligence Series'.

This so-called '**Healthcare Performance Intelligence Series**' represents the culmination of key research findings by the network into a collection of reports providing methodological, practical, and policy guidance. Reports in the series are tailored to different audiences, ranging from policy-makers, hospital managers, clinicians, and the general public. The development of each report in the series has relied on close collaboration across the HealthPros network. The range of topics and resources making up this series includes the following:

Practical experience with implementing disparity and composite measures in large-scale routine quality improvement work to support transferability to other HC systems (No. 1.2 2022)

A practical guide towards actionable healthcare performance indicators: Selecting healthcare performance indicators that are fit for purpose and use for various stakeholders (No. 1.3 2022)

Policy guidance on advancing the performance assessment of integrated healthcare systems (No. 1.4 2022)

Policy guidance on the use of PREMs to improve health system performance (No. 2.2 2022)

Policy summary report on the value of results-based tools in health care management-Lessons learned from COVID-19 dashboards (No. 2.3 2022)

Business model for effectively involving patients in the financial decision-making of health insurance funds- A guide to health care insurers on fostering the engagement of citizens based on recent experiences in the Netherlands. (No. 2.4 2022)

Policy summary report on best practices for linking financial incentives to health care performance at individual health care provider, institutional and regional level- A business case for value-based health care systems based on performance intelligence (No. 2.5 2022)

Policy Brief: The role of nudging for health care performance assessment agencies (No. 3.2 2022)
